Keynote Session 8:15-9:00

Advancing HSE Professionals in Business

Julius Rhodes, SPHR, Principal and Founder, mpr group

This session will examine the critical leadership skills HSE professionals must consistently display for them to be seen not just as leaders within their field, but as leaders capable of successfully operating throughout the organization in goal attainment.

Breakout Session I 9:30-10:30

Fall Protection Update (2 hour session)

Dave Crumbaugh, VP Sales, Standfast USA

Focus on comparing technologies for fall protection on various applications on transportation and construction equipment at 4' to 20' elevations.

On the Road to Success

Ed Lucz, CSP, ARM, CDS, Selective Insurance Company of America

Addresses Fleet Management ABCs including selection, qualification, and supervision of drivers and inspection and maintenance of vehicles.

Shipyard Work from a Contractor's Perspective

Todd Cook, CSP, CET, STS, Corporate Safety Director, Thomas Industrial Coatings

Covers multiemployer/trade and facility owner coordination, access challenges, emergency preparedness, and general water safety issues

Combustible Dust

Steven J. Luzik, PE, CFEI, Senior Process Safety Specialist, Chilworth Technology Inc.

All about combustible dust controls and OSHA's National Emphasis Program

Storm Spotter Training (2 hours)

Jim Kramper, National Weather Service

Become a trained storm spotter and learn about the fascinating world of severe weather in this informative session.

*Updates from
OSHA, FAA,
and EPA!*

Breakout Session II 10:40-11:40

Fall Protection Update (Part 2)

OSHA Update

Dorothy Dougherty, Deputy Assistant Secretary of Labor, OSHA

Ms. Dougherty will explain OSHA's national priorities as well as new standards and strategies to impact worker safety and health.

Silica Controls

Eric Olson, CSP, Safety Director, Western Construction Group

Addresses silica exposures and risks, engineering controls and risk mitigation techniques. We will also discuss OSHA's proposed crystalline silica standard.

Practical Business Continuity—Yes It Really Does Concern Safety

Fred Klapetzky, Principal Consultant/Founder A Going Concern Consulting

Business continuity is an important component of risk management and provides a way to continue operations even though we've had a safety event. The approach and implementation is often complex. This session will change that.

Lunch (Provided) 11:45-12:30

Breakout Session III 12:30-1:30

Workers' Comp Update

Brad Young, Harris, Dowell, Fisher, and Harris, LC

Workers' compensation statutes and case law are changing all the time. Become up-to-date on what you need to know in this always-popular session.

Panel Discussion: What's New in Construction Safety?

Bill McDonald, CSP, Area Director, OSHA; **Shannon Niles**, Safety Director, Paric Constructors;

Barry Stelzer, CHST, Safety Director, Carpenters District Council

Join the discussion as the panelists explore current safety and health issues in construction. Get valuable insight from OSHA, labor, and contractor perspectives.

Kinesthetic Learning

Mark Woodard, M.Ed, EMT-B, Missouri Employers Mutual

This session introduces participants to a highly-effective four-step training method developed during World War II for hands-on work, use of tools, and equipment. It's perfect for anyone wishing to improve their skills in instruction!

Combined Safety & Wellness Programs: Benefits and Guidelines

Nicole Thompson, CSP, State of MO

This presentation will explain potential reductions in workers' compensation costs achieved by incorporating a workplace wellness program into an injury and illness prevention program.

OSHA Investigation

Joe Dartt, Industrial Hygienist, Occupational Safety and Health Administration

Follow the investigation as an OSHA industrial hygienist initiates an inspection, discovers hazards, issues citations and evaluates abatement.

Final Exhibitor Break 1:30-2:00

Breakout Session IV 2:00-3:00

FAQs About Respirators You Were Afraid to Ask

Chris Merli, CIH, CSP, CHMM, Executive Director, Safety Council of Greater St. Louis
Lynn Lechner, CSP, Sr. SMS Consultant, Selective Insurance

This session will address the perplexing questions related to respirator use, selection, wear-time, cleaning, fit testing, and more in a “fun” game show format.

Computer Work Station Design

Rodger Tepe, PhD, Associate Professor, Logan University

Millions of people spend millions of hours at computer workstations that are not well designed, resulting in musculoskeletal symptoms like shoulder, elbow, wrist, neck, and low back pain. This session will present an overview of computer workstation standards, musculoskeletal conditions associated with poor workstation posture and design, and data from a study using OSHA checklist scores.

What's Up With DOT?

Lois Umland-Messer, Special Agent, U.S. Department of Transportation

This session will provide an update and information regarding changes to the hazardous material regulations and lithium batteries.

SDS Chemistry

Frank Phillips, Owner, Phillips Environmental

This session will define common SDS terms such as: SG, VP, FP, boiling point, evaporation rate, combustibility, flammability, and many others.

Uncovering the Keys to Turning Your Employees Into Safety Advocates

Mark Levesque, Vice-President, The Survey Institute

Discover a unique methodology for identifying key employee behaviors that can impact the process of promoting and practicing safe work habits, leading to higher employee safety engagement.

Breakout Session V 3:10-4:10

Employee Misconduct and Affirmative Defenses

Julie O'Keefe, Partner, Armstrong-Teasdale, LLP

OSHA cannot issue a citation when certain circumstances are met. Find out if your situation meets the criteria.

EPA Update for Region VII

David Codaz, U.S. Environmental Protection Agency

This session will cover the more common environmental laws and any updates occurring this legislative term.

Residential Foreman Fall Protection Awareness Training

Barry Stelzer, CHST, Safety Director, Carpenter's District Council

John Mormann, Southern Illinois Carpenters Training Center

This session will cover OSHA's fall protection requirements for wood frame structures with a focus on residential home building. Work procedures and fall protection methods will be discussed for each phase of the building process.

Workplace Violence - Developing your Prevention and Response Plan

AJ Gajdosik, CSP, ARM-P, Consultant, Nationwide Insurance

This information filled session will give you the tools and resources to develop and implement your own workplace violence prevention and response plan.

Legalized Marijuana and Your Drug-free Workplace

Josh King, President, MoralStone Drug Screening

This session will cover drug testing, the difference between DOT and non-DOT testing, and various drug testing methods. The pros and cons of each drug testing method will also be discussed. A summary of the "must haves" in a drug-free workplace program will be covered.
